Giant Amaryllis growing in greenhouse

BEAUTY IS CONTAGIOUS

First of all people catch the idea, then try to make it come true. First, plant the idea of beauty in the minds of your patrons, and then show them how your plants will produce beauty for them.

"They" say "nothing succeeds like success." "They" must have been thinking of our Plants and Bulbs and Roses, which are in just that class. We grow more roses than you think, and then some extraordinary things too; *note* these showy lilies, and on a separate sheet, learn to know the *finest Cannas in the world*. Those words mean just what they say.

GIANT AMARYLLIS

HYBRIDS OF VITTATA

FLOWERS 5 TO 7 INCHES ACROSS

(See Cut)

If you could see, in reality, the flowers of this magnificent Amaryllis you would be amazed, first at their size and then at the brilliancy of the colorings, which range from deep reddish maroon to pure white and striped. Our bulbs are grown from seed obtained several years ago from France through the Department of Agriculture at Washington, where they had tested these Amaryllis—as shown in the greenhouse in the illustration. Every bulb has a magnificent, flower-crowned stalk and some have two, with two or more flowers to each. In the few years since it was introduced this flower has become very popular, and this popularity has grown without effort on our part, for practically all flower-loving people when they see a plant in bloom want one or more for their own use. There is no secret in the culture; simply plant your bulb in good rich soil, mixed with a little sand and *do not* use a pot much larger than the bulb, for Amaryllis bloom best when they are pot-bound. After the bulb is done flowering, withhold water gradually and allow it to rest for two to three months.

PRICE—1½ to 2 in., 12 for $3; 100 for $25.
2 to 2½ in., 12 for $4; 100 for $35.
2½ to 3 in., 12 for $7; 100 for $50.

CLEMATIS PANICULATA

Japan Clematis or Virgin's Bower

This is the easiest to grow of all clematis and it has a variety of uses, for it can be used for planting on sloping banks, among rocks or for covering graves. It is mostly in demand for making shade on porches as it is a rapid climber with small, dense green foliage and pure white, deliciously fragrant flowers. In August and September the plant becomes covered with delicate white blooms which are followed by silvery feathery seed, making an attractive show until mid-winter. PRICE—

2½-inch pot grown plants, $9 per 100; $75 per 1000.

2-year field grown plants, $15 per 100.

FRENCH HYDRANGEA, BOUQUET ROSE (See Cut)

The finest flowering shrub you can have for porch or lawn decoration. It can be grown as easily as a geranium and the great panicles of bloom come in such quantity as to almost cover the bush. Color is rosy amber, passing to bright pink. The flowers will come blue if you incorporate one-half pound of alum, broken into pieces about the size of a hickory nut, with each bushel of soil. Use good soil and plenty of well-rotted manure when potting and supply liberally with water when in active growth. No trouble selling these plants.

PRICE—Pot-grown plants, 2 to 3 branches, 3-inch pots, $25 per 100. Field-grown, 3 to 5 branches, suitable for 5 or 6-inch pots, $40 per 100.
